MENTAL Play 2014/15 Tech-Spec'

The spec' below can be simplified to necessity for AV projector and Screen and hot and cold washes with three specials.

LIGHTS:

The fixed rig of warm/cold washes. Ideally, 2 LED flood panels to be rigged in the center truss, a 3-5d mx adapter would be useful or cabling and a controller to run independently (2x 13a trs long enough to go from a socket to the truss.) Specials - a fresnel or pc coloured with L#101 on the SL side of the truss. One fresnel on the FOH bar with L#115. An empty cue stack or subs page along with a rig-plan of what is up would be very helpful indeed.

SOUND/AV:

We will be using a macbook pro and will need a 3.5mm stereo mini jack connector to a mixer and PA. Please can you supply a mixer/PA set up AV?

We will be using a macbook pro running Qlab which will need connecting to the projector via a VGA cable. We will bring all relevant DVI to VGA mac adaptors. Please could you supply VGA cables or connection to projector?

SET/PROPS:

x1 coffee table
x1 desk
x2 wicker chairs/fold-up sofa
x1 bookshelf
x1 bean-bag
x1 pot plant
x1 throw paperback books
x1 bottle beer-can/bottle
x Giant Jigsaw Puzzle
x 1 electric cigarette
